Tent beds and Soft & Safe beds

Our series of Tent beds and Soft & Safe beds is specifically designed for clients with a tendency for head banging, or those who suffer from epilepsy. Barry Emons' fixed beds may offer a good solution, but are often not optimal for this type of clients. Our fixed beds are made with padding to prevent injury, but they do not take away the urge to seek resistance.
A wooden bed naturally gives resistance and this comes with accompanying sound and effect.

For a decade now, Barry Emons has offered the solution: the Soft & Safe series. The main feature in this series is the tent structure, which is suspended in a frame. The nice thing about a tent-bed is that it gives way. There is hardly any resistance, eliminating the effects of head-banging behavior.

Most of our beds are produced in our own facilities. For two types of beds though we work with the English specialist Safespaces. They have chosen Barry Emons to be their exclusive representative in the Benelux.

This series consists of several different types, each with specific properties :
SoftFit
SoftFit Plus
SoftFit Low Entry
SoftFit IC
SoftFit Smart
Safespace
Safespace bed
ComFit

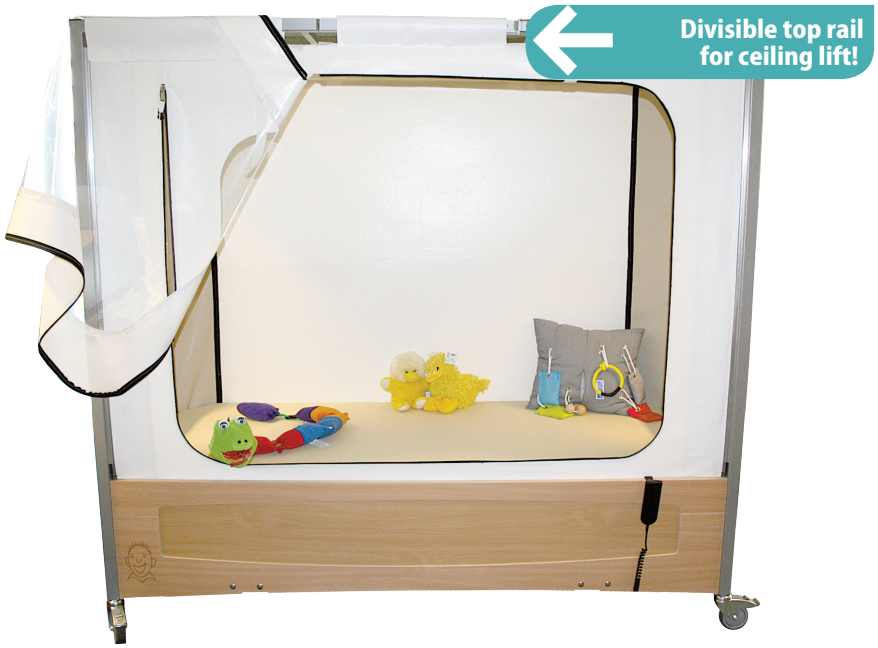

SoftFit

SoftFit bed

The SoftFit bed is a crossover between a Cosyfit and a Tokyo cot bed. The SoftFit bed is constructed on the Tokyo cot bed base, creating the ideal mobile cot bed. The top (sleep and rest part) is made of Bisonyl. Due to its soft structure, this bed is very suitable for people who pose a threat to themselves and can injure themselves in a normal bed.
The SoftFit can be used everywhere, at home and in institutions. It is also regularly used in psychogeriatric units in elderly homes.

The steel frame on the outside and the inside are neither visible nor accessible to the client. The bed can be opened at the front with a zipper and is therefore easily accessible for caregivers. The front and short sides are windowed with PVC. A high-low system comes standard, as does the retractable frame for access via a ceiling hoist.

The dimensions of the SoftFit bed are 90 x 200 cm (mattress size) and the external dimensions are 98 x 208 cm, allowing it to fit through most 100 cm doorways. The surrounding panel is 140 cm high, as measured from the top of the mattress. The SoftFit's standard colours are sand and white. Other colour combinations, as well as many other options, are available at extra costs.

Standard SoftFit bed

Specifications	Standard	Option
Lying surface		
90 x 200 cm	✓
