MULTI-SENSORY ROOMS

Having been involved in the design and fitting of multi sensory environments across Northern Ireland and Scotland for the last 20 years, Moorings Mediquip are now very excited to be able to bring to you a new partnership with a local manufacturer, The Sensory Pod and Softplay brands. This partnership allows us to offer bespoke design, exceptional quality and prompt delivery & installation at even better prices.

Schools, Hospitals and Public buildings should be spaces that feel comfortable, safe and designed to cater for all people, especially for those who struggle with processing environmental stimuli. A Multi-Sensory, or calming room, provides that safe, relaxing and comfortable space for all.

Designed to stimulate and soothe the senses and help build key development skills. They're immersive environments with specialist equipment to promote developmental interactions. They also provide a calming and relaxing environment designed to reduce the likelihood of meltdowns and panic attacks.

- Manufactured in Ireland - measured, built and fitted by the same team.
- We design and customise your rooms directly with you
- Higher quality materials - medical industry standards
- We offer more options - wider variety of colours & products

Softplay®

MULTI-SENSORY ROOMS

As all our rooms are bespoke and unique, our design teams motto is:

"The answer is yes - now what's the question!"

We pride ourselves in only using the best quality materials in our rooms, which provide a much higher and long-lasting finish. Our vinyl coverings are unique, as they are engineered for healthcare environments, which ensures they're easy to clean, anti-bacterial/anti-fungal, flame retardant, abrasion resistant and smooth to touch.

We also have the widest and most vibrant colour range, which deliver unique rooms every time, without creases and that do not lose strength over time.

Our project team, will listen to your needs and design you a unique room manufactured by a team of highly skilled craftsmen and seamstresses, based in Dublin at The Sensory Pod. Our delivery team will professionally install your room, usually within one day ensuring the minimum of disruption to your school or home.

NO SPACE - NO PROBLEM!

If you don't have space or an available room, check out the Sensory Pod...

The Sensory Pod is an affordable, calming and relaxing space for both Children & Adults. Used in schools, Universities, Hospitals, Libraries, airports, any public areas, as well as family homes. It allows the user to withdraw, cocoon, regulate and de-escalate within minutes, when they're feeling anxious or overwhelmed. A better option for teenagers/adults that have outgrown the many benefits of most sensory rooms.

Measuring only 8' x 4' it can fit in a hallway, lobby, under a stairwell or in a small room providing an effective alternative to Sensory Rooms. It provides a no-build assembly option.

- Helps prevent and manage disruptions
- Anyone with anxiety or panic attacks benefit
- Provides a more positive and relaxed environment
- Improves attendance, participation and performance
- Educational resource, 32" screen mirrors SEND laptop/phone
- Increases independence with reduction in anxiety
